Nicolas Iracheta

956-833-1945

PROFESSIONAL SUMMARY

IT professional with a Bachelor of Science in Information Technology, an MS in IT Management, and over four years of hands-on experience supporting Windows desktop and server environments, network infrastructure, and end-user technology. Skilled in Tier 1 and Tier 2 help desk support, including troubleshooting hardware, software, email, mobile devices, and network connectivity issues. Proficient in Active Directory, Microsoft O365, endpoint security, and ITIL-based incident management. Strong customer service orientation with experience training end users and documenting solutions for repeatable support.

CORE COMPETENCIES

Help Desk & End-User Support: Tier 1/Tier 2 Support, Incident & Request Ticketing, Windows Desktop (7/10/11) Troubleshooting, User Training & Documentation, Remote Support, Mobile Device Support (iOS/Android)
Systems & Infrastructure: Windows Server Administration, Active Directory & Group Policy, VMware/Virtual Desktop Environments, Patch Management, Endpoint Security, Image Deployment, File Server Support
Networking & Communications: Network Troubleshooting (TCP/IP, DNS, DHCP, Fiber/Copper), VOIP Phone Systems, Cisco Unified Communications, VPN Configuration & Support, Video Conference Systems (Zoom, Teams)
Applications & Tools: Microsoft O365 (Outlook, Teams, SharePoint), SysAid / ITSM Ticketing, Antivirus & Endpoint Protection Suites, Kiosk & Public Access Terminals
Security & Compliance: Security Baseline Compliance (CIS Benchmarks), Access Controls, Multi-Factor Authentication (DUO/MFA), Vulnerability Assessment, Incident Response

CERTIFICATIONS

- CompTIA A+
- CompTIA Network+
- CompTIA Security+
- CompTIA Project+
- AWS Certified Cloud Practitioner
- Linux Foundations
- Axelos ITIL Foundation Certification

PROFESSIONAL EXPERIENCE

Network Technician
TelePro Communications | Mission, TX | Jan 2026 – Present
- Provide Tier 1 and Tier 2 technical support for enterprise network and desktop environments, responding to help desk requests via phone, email, and ticketing system to diagnose and resolve hardware, software, and connectivity issues.

• Deploy, configure, and troubleshoot Windows desktops and servers in a Microsoft environment, including physical hardware setup, OS imaging, application installation, and Active Directory user/account management.
• Support end users with Microsoft O365 applications (Outlook, Teams), mobile devices (iOS/Android), printers, and peripheral equipment, ensuring minimal disruption to daily operations.
• Monitor network performance and server health using monitoring tools; troubleshoot and resolve network connectivity issues across fiber and copper infrastructure.
• Implement and enforce security controls, access policies, and endpoint protection configurations including antivirus definitions, patch deployment, and baseline compliance aligned with organizational standards.
• Maintain detailed incident and request logs in the ticketing system, documenting troubleshooting steps and resolutions to build a repeatable knowledge base for recurring issues.
• Coordinate with cross-functional teams to support application deployments, system updates, and infrastructure upgrades; assist in capacity planning and hardware/software inventory management.
• Available for after-hours emergency response to resolve critical system failures and maintain 24/7 operational readiness.

Linux Systems Administrator / Infrastructure Engineer
Home Lab Server Environment | Alton, TX | Oct 2022 – Present
• Architected, built, and administered a multi-service Linux server from individual components, providing centralized storage, virtualized application environments, and secure network file sharing for multiple clients.
• Managed virtual machine environments (KVM/QEMU) including resource allocation, snapshots, backup scheduling, and application deployment within isolated virtual environments, directly applicable to VDI and virtual desktop support.
• Configured and maintained Active Directory-equivalent access controls with role-based permissions, SSH key-based authentication, and firewall rules following CIS benchmark security hardening guidelines.
• Implemented proactive system monitoring (cron-based health checks, log analysis) for early detection of CPU, memory, and storage issues, reducing unplanned downtime.
• Configured and supported VPN connectivity for secure remote access to server resources.
• Documented all system configurations, standard operating procedures, and troubleshooting guides to support repeatable administration and knowledge transfer.

EDUCATION

Master of Science, IT Management
Western Governors University | May 2026
• Coursework: IT Operations Management, Financial Management for IT Professionals, Strategic Technology Leadership, Technological Globalization

Bachelor of Science, Information Technology
Western Governors University | September 2025
• Coursework: Network and Security Foundations, Cloud Computing, Data Management, Scripting & Automation
• Four-year program completed entirely in a Microsoft Windows environment, including hands-on lab work supporting Windows desktops, Active Directory configurations, network troubleshooting, and endpoint security across multiple Windows versions (7, 10, 11).
